SUMMARY

Frontend Engineer with 4.5+ years of experience building and scaling end-to-end web applications. Experienced in AI-assisted development using Claude and Cursor to accelerate delivery, automate testing and debugging workflows and improve developer productivity. Strong focus on product thinking, performance optimization and delivering impactful user experiences.

SKILLS

- **Languages and Frameworks:** React.js, Next.js (SSR, SSG, App Router), TypeScript, Vue.js, Material UI, Tailwind CSS, Storybook, Chart.js.
- **State Management:** Redux, Pinia, Vuetify
- **API Integration & Backend Exposure:** REST APIs, tRPC, API Integration, Authentication Flows, Node.js, PostgreSQL/Prisma (working knowledge)
- **Testing & Automation:** Playwright (E2E Testing), UAT Pipelines, Debugging
- **UI/UX Design:** Wireframing, Prototyping, Adobe XD, Figma, Product Thinking
- **AI-Assisted Development:** AI agent workflows, debugging automation (Claude, Cursor)
- **Strengths:** Product thinking, system design awareness, AI-UX collaboration

WORK EXPERIENCE

Software Engineer II, Techjays, Coimbatore
(currently working remotely)

July 2021 - Present

- Built and scaled high-performance frontend applications using React, Next.js, and TypeScript
- Delivered **end-to-end product features**, including API integration, state management, and deployment workflows and Integrated **type-safe APIs (tRPC)** to improve frontend-backend consistency and reduce runtime errors
- Leveraged **AI-assisted development** (Claude, Cursor) to accelerate debugging, testing, and delivery
- Implemented **automated E2E testing** pipelines (Playwright + CI/CD) to catch regressions early and reduce manual QA
- Led and **mentored a team** of 3 developers, improving code quality and delivery efficiency
- Migrated legacy Angular applications to React, building reusable components and improving scalability
- Reduced development time by **30%** and bug rates by **35%** through optimization and testing practices
- Deployed and maintained applications using **AWS Amplify, Vercel and CI/CD pipelines**

PROJECTS

AI-Powered Testing & Engineering Workflow Automation

Tech: Playwright MCP, Claude Code, Claude Agent SDK, MCP, GitHub Actions, TypeScript, Node.js

- Built an automated Playwright MCP E2E testing pipeline running on every pull request, detecting UI regressions early and improving release reliability
- Integrated tests into **GitHub Actions CI**, blocking merges on failure and shifting QA earlier in the development lifecycle
- Developed AI-driven workflows using Claude agent skills to automate debugging, **UAT planning**, test execution, and PR review
- Designed composable workflows (e.g., /uat → plan → run → promote), enabling engineers to trigger full UAT cycles with minimal effort
- Impact: **Reduced manual QA effort**, accelerated testing and debugging cycles, and improved developer productivity by automating repetitive SDLC tasks

AimeeSays — LLM-powered AI Chatbot for Abuse Survivors

Tech: Next.js (App Router), tRPC, Prisma, PostgreSQL, Lucia Auth, AWS

- Built and **delivered full-stack features** across chat, document processing, authentication, and Integrated LLM-based conversational workflows to generate context-aware responses
- Owned feature delivery from API design (tRPC) to React UI, ensuring consistency and performance
- Implemented two-way **voice interaction (Speech-to-Text + Text-to-Speech)**, enabling hands-free, accessible conversations - critical for vulnerable users who may need discreet, audio-only interactions with the chatbot.
- Implemented secure data handling practices, including structured logging with auto-PII redaction and team-scoped access controls

Angular → React Migration & Client Delivery

Tech: React, Redux, Material UI, AWS Amplify

- Led migration of a legacy Angular application to React, ensuring continuity for multi-region clients
- Collaborated with stakeholders to gather requirements and built a reusable component library, improving development efficiency
- Developed optimized components that reduced frontend development time by 30% across projects
- Improved code quality and reliability, contributing to a **35% reduction in bugs** through testing and best practices
- Impact: Delivered a scalable frontend architecture and improved developer productivity, earning the **"High Flyer" Award** (2023)

EDUCATION

Master of Arts in English Literature

Alagappa University, Karaikudi, Tamil Nadu

July 2022 - May 2024
